

Entrepreneurship education at school

What is done in Brittany

Entrepreneurship education at school

In the « Rectorat » there is a bureau for the relationships between schools and enterprises called CAREE.

This bureau is composed of National Education employees and engineers made available by the enterprises.

Entrepreneurship education at school

Its missions are:

- the relationship between employment and formation
- the partnership with professional and institutional organisations
- the quality process in high schools
- the development of enterprising spirit

➔ Entrepreneurship education at school

The enterprise in vocational studies

- The knowledge of the enterprise is part of all the formations (one hour a week minimum)
- The formation consists of a combination of school and training periods (from 12 to 22 weeks' training courses in enterprises)
- The formations are based on relationships with local enterprises, with employees intervening in classes on different themes, with equipment provided by the enterprises...
- The certification of the diplomas is shared with the professionals.

The enterprise in middle schools and high schools:

- In middle schools, a lot of initiatives are taken to incite teachers to develop relationships with the enterprises, particularly in the « Parcours de Découverte des Métiers et des Formations » program.
- In high schools, all the pupils have to follow a course about knowing the enterprise .

Entrepreneurship education at school

3 emblematic programs in Brittany:
