**ENMS4SMEs**

Energy can be managed for a happy  
world.

European Energy Management Specialist for SMEs

Camera di Commercio  
Padova

ecoserveis

- EEMS4SME : European Energy Management systems for SME's
- What ?
  - *An open training and innovative digital platform all over Europe for qualified energy managers.*
  - Article 8 of the European Energy Efficiency Directive imposes guidelines for carrying out an energy audit for companies/SME.
  - In this way, companies are aware of their energy consumption and of the opportunities to save energy and to make it more sustainable.

Erasmus+

- Erasmus
- September 2019 - August 2022

ENERGY MANAGEMENT SPECIALIST Certification Program has been developed for SME's and for technical staff

- Energy efficiency doesn't mean to realize milliondolar projects
- Efficient design is the first step of efficient operation
- Development of an institutional structure aiming to reduce energy consumption
- Energy management is not only about technical issues but also about human factors. It's also about gaining behavior and culture based on sustainable energy efficiency
- Clarified process related to significant energy uses (SEU) to make a logic "flow" and connected criteria: Identify SEUs => For each SEU define the relevant variables, current energy performance and identify persons or situations that influence or affect the SEU.
