

MICROVET:

An opportunity to upskill VET graduates

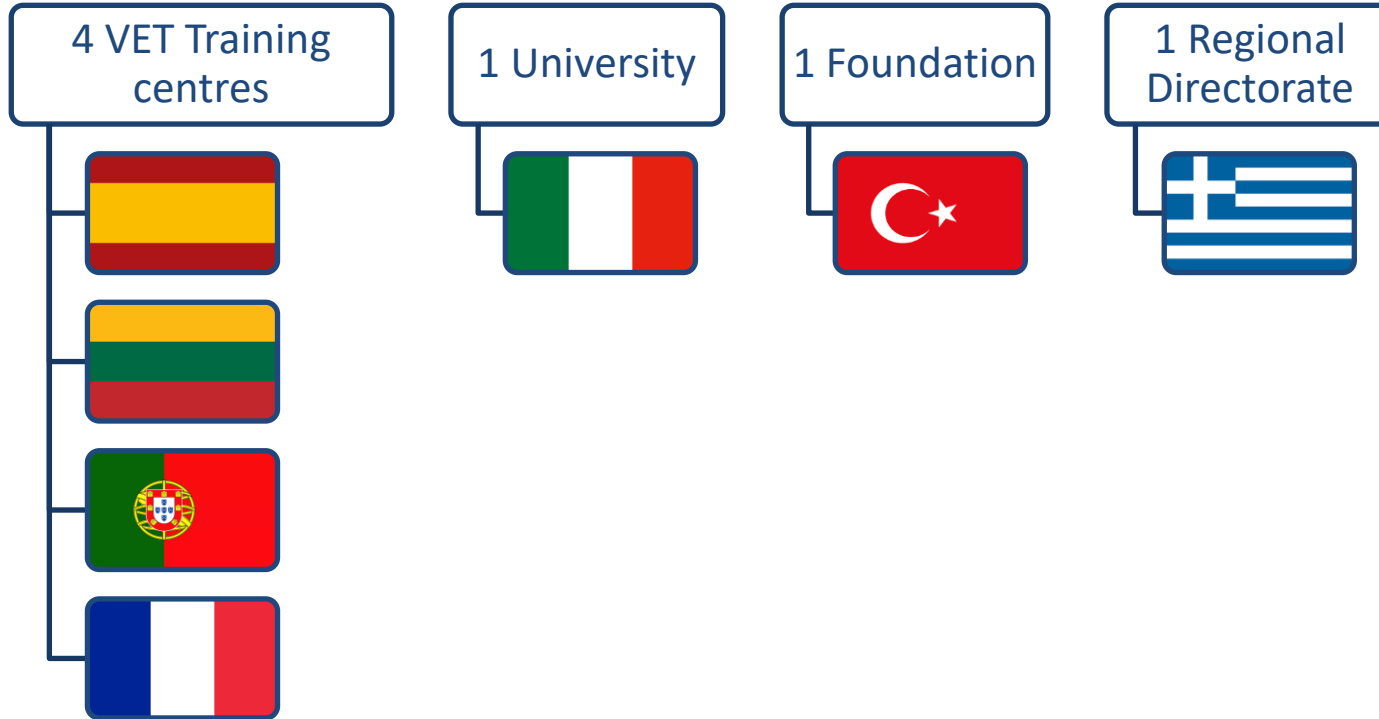

(A KA2 Erasmus Application)

WHY?

1. The launch of the new VET Spanish law that takes into account micro credentials
2. The launch of the recommendation proposal on Micro credentials
3. The variety of existing non standardised micro trainings all over Europe and the lack of a standardised framework (programmes based on competences, capitalization possibilities, evaluation procedures,...)
4. The lack of formal recognition of some small trainings (alignment with National or EQF)
5. The increase of training demands due to the emerging sectorial needs

WHO?

WHAT WE PROPOSE

1

Analysis of the labour requirements
for 2030 in the territorial areas of the
partnership (emerging sectorial needs)

2

Analysis of the features of short
trainings in the context of VET in
the partnership countries

At this stage, we aim to compare the flexibility of the VET curricula in Europe and its possibilities of recognition and capitalization

Technician in Administrative Management 2000 hours						
COMPETENCE UNIT	Module code	Modules	Hours	Training unit code	Training Units	Hours
UC0980_2: Carry out administrative support activities for Human Resources.	M03	Human resources administrative operations	99	TU 01	Selection and training	33
				TU 02	Hiring and remuneration	33
				TU 03	Work activity processes	33
UC0979_2: Perform administrative treasury procedures.	M04	Auxiliary treasury management operations	132	TU 01	Treasury control	33
				TU 02	Processing of financial and insurance instruments	66
				TU 03	Basic financial operations	33

RESULT 1

- Handbook on the structure and use of micro credentials
 - A document outlining the agreed key characteristics and features of successful micro credential training, including recommended features and modes, accreditation possibilities and link to other European initiatives (e.g. Europass).
 - A document specifying how to proceed when designing micro credentials

At this stage, we also aim to analyse other accreditation possibilities

European Data Strategy

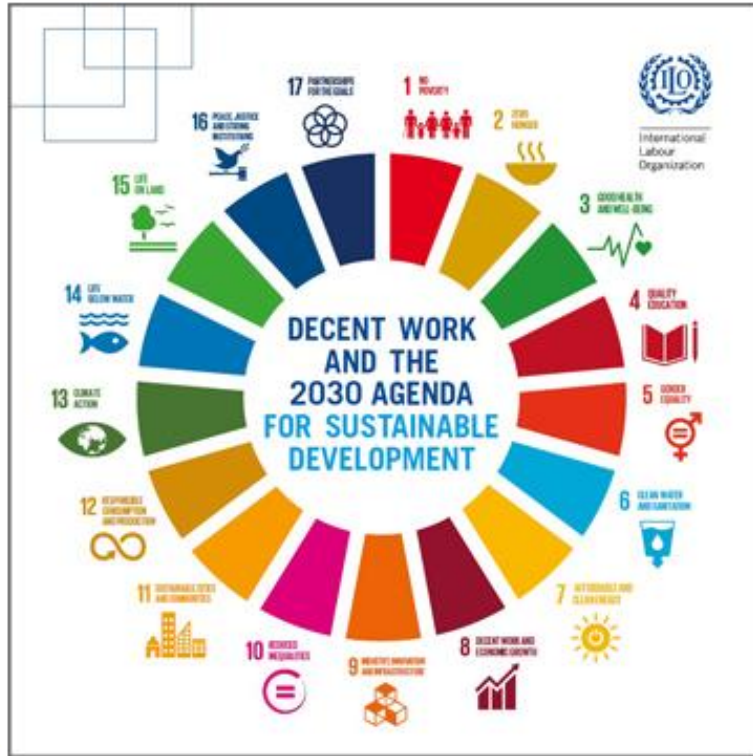

European Skills Agenda

RESULT 2

- Design of three micro credential programmes focussed upon the findings in the research (labour requirements) and the proposed features of Result 1.

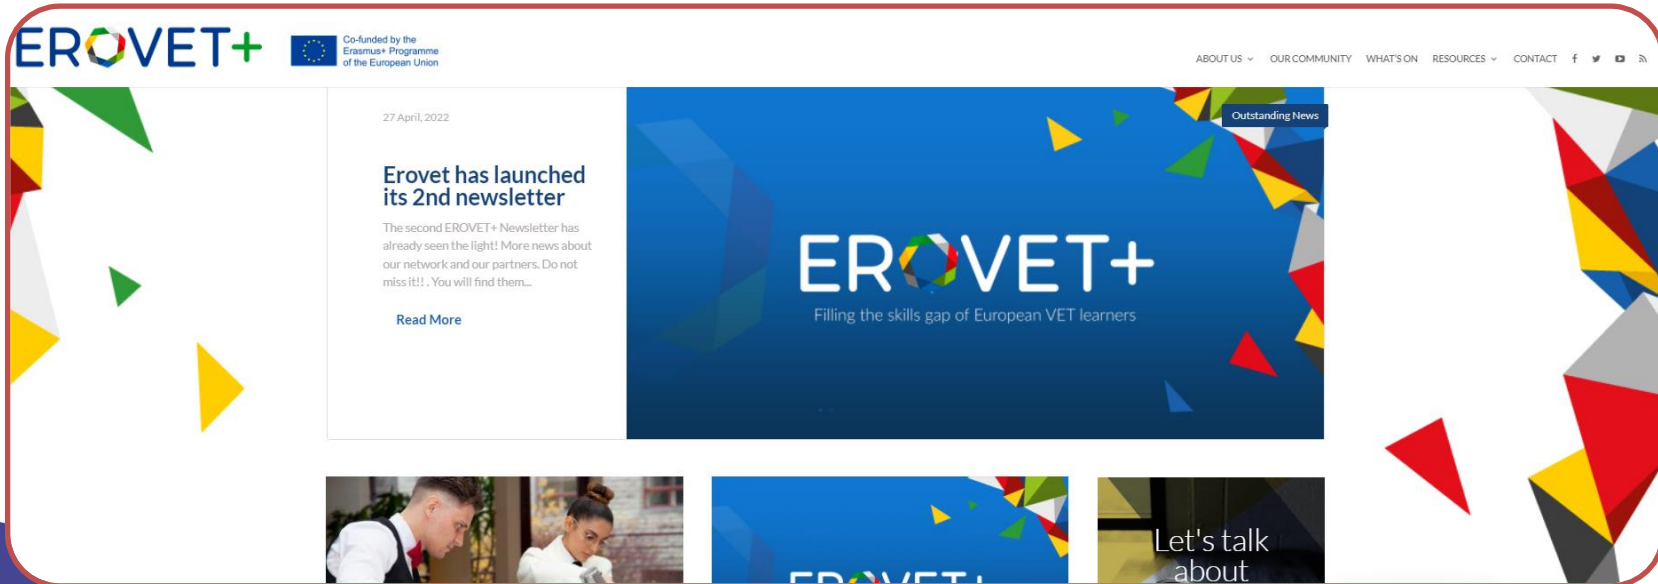

At this stage we might also consider the Sustainable Development Goals

RESULT 3

- **Development of a digital repository (E Graduate)** to access the micro credential programmes and provide opportunities for collaboration, sharing best practice and developing new micro credential programmes.

Some of the partners in the Project also created the **EROVET community**: www.erovet.eu. Therefore, the website could serve as the hosting place of the **E Graduate repository**
