

Webinar 2: New European Bauhaus

Background information

New European Bauhaus – innovative learning places and training

Within the New European Bauhaus, sustainable transformation is in focus concentrated around the three words BEAUTIFUL, SUSTAINABLE, TOGETHER. How can this be done when many come together to make the transformation happen in our learning environments? Informal and formal education joining forces? Social sustainability at its best – hand in hand with ecological sustainability? The ideas are many and the change is needed. We need to innovate the way we innovate!

Learning Outcomes:

- Transformation of places of learning includes ALL types of learning; formal and informal
- Are YOU on the right track for sustainability development? In the broader perspective; biosphere/green and climate friendly sustainability, societal/social sustainability, economical sustainability. In collaboration?
- We need to make changes in education for sustainability; new mindset and better thinking.

Key Points

- “If the Green Deal had a soul, it would be the New European Bauhaus” (Ursula van der Leyen)
- We need to innovate the way we innovate!
- The New European Bauhaus would not be what it is without a bottom up perspective.
