

## TECHNICAL COLLEGES – HISTORY AND EVOLUTION

# 2008 PUBLIC PERMISSION STATEMENT

Technical Colleges, which offer non-university tertiary, post-diploma training courses, are a wholly new development in the Italian educational sector. These institutes managed by private-law foundations promoted by the Ministry of Education and the Regions as schools for excellence to assist in the economic development of one of the most competitive national sectors. In addition to the aim of providing companies with highly qualified technicians, Technical Colleges aim to promote and spread the culture of technical innovation and to support the transfer of information between companies in the sector.

The approval of the Italian Law No. 99 on the 15th of July 2022 helped to strengthen the Technical College system. The addition of the term 'Academy' to its title better identifies it as a college and avoids any confusion with High School institutions. Thus the acronym MITA was born ("Made in Italy Academy)

Established in 2010, MITA is the first Technical College in Tuscany providing a highly professional, technical profile in the world of fashion. Founded with the aim of providing young people with qualified job opportunities in the Made-in-Italy sector, MITA provides a technical/scientific educational program based on the acquisition of skills through a practical, 'learn by doing' methodology.

## GOVERNANCE OF THE MITA FOUNDATION

#### **EXECUTIVE BRANCH**

- EXECUTIVE BOARD CHAIRED BY THE PRESIDENT OF THE ITS FOUNDATION Maurizio Del Vecchia- BUSINESSMAN maurizio@delvecchia.com
- BOARD OF DIRECTORS
- · SHAREHOLDERS' MEETING
- · AUDITOR External Party

#### MANAGEMENT BRANCH

• THE GENERAL MANAGER Antonella Vitiello – Expert in Training, Education, Research and Employment antonella.vitiello@mitacademy.it

#### **EDUCATIONAL BRANCH**

SCIENTIFIC TECHNICAL COMMITTEE

Chaired by a Coordinator Alessandro De Rosa – Expert in Training, Education, Research and Employment from the University

# STAKEHOLDER al 2022

# EDUCATIONAL TRAINING

#### MITA OFFERS:

- Two-year vocational training in the MADE IN ITALY fashion sector for the obtainment of a specialised Diploma (Level V of the European Qualifications Framework for lifelong learning E.Q.F.). The courses have limited places and accept students by means of a public selection procedure. Attendance is compulsory and successful completion of a final exam is required to obtain the Diploma, which is recognised in all EU Member States and by the most accredited institutions in the world. Moreover, credits can be used for the continuation of university studies.
- · Courses of variable duration to obtain a certification and/or certificate of attendance for specific professional profiles in the fashion setting.

#### Basic and soft skills training areas:

- · Linguistic/relational/informatics
- Scientific and technological
- · Legal-economic
- Management
- Project management
- Problem setting, problem solving e crisis management

#### Vocational training:

- Fabric technology
- · Computer-aided industrial design (CAD)
- Elements of CAD\_CAM and rendering for fashion
- Prototyping and additional manufacturing
- Modelling and prototype design techniques
- · Production costs and bills of materials
- Processing cycles

- Industry and product marketing
- Production planning and control
- Sourcing of fashion companies and network managing
- · Life Cycle assessment
- Sustainability of production cycles and systems
- LEAN and AGILE work cycles
- Digital technologies for fashion accessories:
   PM1 software and spatial augmented reality.
- Virtual prototyping training
- · Enabling technologies 4.0

# IMPLEMENTATION OF MITA TECHNICAL COLLEGE COURSES FROM 2010 TO 2022

### IN 2010...

- FIRST COURSE BEGAN WITH 20 STUDENTS
- UNTIL 2014, ONLY ONE COURSE PER YEAR WAS OFFERED, WITH A MAXIMUM NUMBER OF 25 STUDENTS PER COURSE

### IN 2022...

- 31 COURSES OFFERED
- 796 TOTAL TRAINEES
- 9 ACTIVE COURSES
- 461 GRADUATES
- 6 NEW COURSES LAUNCHED IN 2022

MITA graduates have an over 95% success rate in obtaining future employment, above the national average of 85%

# **INTERNSHIP**

MITA has always built strong relationships with leading companies in its field in both the national and international sectors.

Thanks to these exchanges, we are able to create training courses for the required professional profiles and to offer our students the opportunity to participate in real-life work scenarios.

Our internships allow the students to put directly into practice "in the field" the skills they have learnt during their training period and to gain practical knowledge and familiarity as part of a real professional team - along with taking part in a direct assessment process for an actual job, related to the course of study.

# **TEACHERS**

The courses make use of qualified teachers from the world of work and related professions, providing over 90% of the teaching cohort, joined in smaller percentages by professors and teachers in the university and research sectors and, finally, from secondary schools.

# NATIONAL PERFORMANCE MONITORING SYSTEM BY THE INDIRE INSTITUTE

The training performance of the courses implemented by the Italian Technical Colleges is monitored annually on behalf of the Ministry of Education by the INDIRE Institute via a database which is regularly updated and which analyses the movements and actions of these colleges.

The results are included into benchmark assessments that produce levels of rewards, resulting in additional economic resources for the deserving college. So far, MITA has achieved, for each year analysed, awards for both training content and employment values.

- In 2016 1 award (1 course/1 course General position in Italy 16/67)
- In 2017 1 award (1 course/1 course General position in Italy 31/97)
- In 2018 1 award (1 course/ 1 course General position in Italy 12/113 Chain position 2/7)
- In 2019 2 awards (2 courses/2 courses General position in Italy 11 and 27/139 Supply chain position 1 and 2/8)
- In 2020 2 awards (2 courses/2 courses General position in Italy 40 and 42/187 Supply chain position 3 and 4/11)
- In 2021 2 awards (2 courses/2 courses General position in Italy 24 and 30/201 Supply chain position 2 and 3/12)
- · In 2022 3 awards (3 courses/4 courses General position in Italy 22,87 and 116/260 Supply chain position 3, 7 and 8/18)

# LOCAL OPEN WORKSHOPS

More than 1,000 square metres of instrumental, technological and digital innovation, aimed at increasing efficiency levels and production competitiveness.

Thanks to Regional and POR CREO FESR 2014-2020 funds aimed at improving the local workshops where the teaching activities of Technical Colleges' courses take place, MITA Foundation was able to implement a training initiative, providing it with appropriate spaces.

- \* Cutting-edge equipment for teaching technical and vocational skills with a high degree of digital innovation.
- \* Dynamic, innovative and technologically-advanced spaces in support of the strategies carried out to encourage labour policies in the large manufacturing sector of Tuscan fashion products
- \* Availability for participants in Tuscany and beyond (trainers, learners, workers, entrepreneurs, companies, start-ups and others) of an advanced container that facilitates the dissemination of good practices and high-performance activities.
